AJ SMART BIZ · DOCUMENT 12

New Client Onboarding — Business Requirements Document

The onboarding process for a new business, and the requirements template filled in with each client before their platform goes live.

Audience	Sales, onboarding / support team, platform super admins, and the client
How to use	Part A describes the process. Part B is filled in with the client (one copy per client) and signed off before go-live.
Version / date	1.0 · 7 November 2026

3. Onboarding process and timeline
4. Onboarding business rules
5. Client requirements template (Part B)
6. Go-live acceptance criteria
7. Handover and training
8. Sign-off

Part A — Onboarding process

1. Purpose and scope

This document defines how a new business (“the client”) is taken from signed deal to a live Aj Smart Biz account, and records what that client needs. It makes sure that:

- the right plan is sold, with the features and limits the client actually needs;
- everything the platform needs (branding, domain, content, catalogue, staff) is collected once, up front;
- the client has a working website and company workspace and knows how to use them on day one.

In scope

- Requirements capture and plan selection
- Company provisioning and first payment
- Domain and website design set-up
- Initial content, catalogue, services and stock
- Roles, staff accounts and training

Out of scope

- Custom code or a custom website design for one client
- Payment gateway, SMS or email integration (not yet available)
- Data migration beyond what the console screens accept
- Professional photography and copywriting (optional AI draft only)

2. Roles and responsibilities

Role	Responsibilities
Sales	Qualify the lead (Product website → Enquiries), demo the matching template, agree the plan and price, start this document.
Onboarding executive (super admin)	Complete Part B with the client, provision the company, record payment, configure features, load initial content, run acceptance and training.
DevOps	Point the client's domain to the chosen design (nginx vhost, DNS, TLS).
Client main admin	Supply branding, content, catalogue, staff list; approve the website; accept handover.
Platform owner	Approve non-standard pricing, discounts, quota overrides or storage limits.

3. Onboarding process and timeline

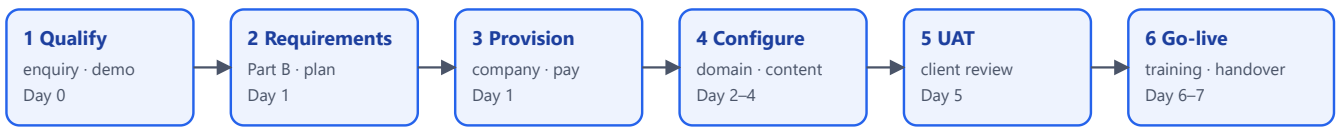

Figure 1 — Standard onboarding in about one week (indicative; depends on how fast the client provides content)

Stage	Activities	System step	Output
1 Qualify	Review demo enquiry; show the template design that fits the trade (default, midnight, atelier).	Super Admin → Our website → Enquiries (status *contacted*)	Interested client, chosen design
2 Requirements	Fill Part B; map needs to features; choose plan and billing cycle; agree price.	Plan Management (create a plan if none fits)	Signed Part B sections 5.1–5.4
3 Provision	Create company with profile, branding, main admin, plan and payment. Copy the one-time admin password. Optionally duplicate a template company or run the AI content creator.	Company Management → New company	Tenant, head-office branch, admin, subscription, transaction
4 Configure	Add domain(s) and branch domains; DevOps adds vhost; switch on features; load slides, About, services, categories, products, warehouses and opening stock; set order mode and WhatsApp numbers; create roles and staff.	Company workspace → Company Details, Warehouse, Roles, Admins	Website reachable on client domain
5 UAT	Client reviews the website and console against section 6; corrections made.	—	Acceptance sign-off
6 Go-live	Training, handover pack, enquiry marked *converted*; first renewal date noted.	Enquiries → converted	Live client

4. Onboarding business rules

#	Rule
OB-1	A company is never provisioned without an agreed plan. A company with no running plan cannot create branches or admins, and its website shows a holding page.
OB-2	Only features ticked on the plan can be switched on. If the client needs a feature, choose a plan that grants it — do not promise it otherwise.
OB-3	Limits (branches, admins, storage) come from the plan at activation. Changing the plan later does not change a running term; use upgrade instead.
OB-4	The generated main-admin password is shown once. Deliver it securely; the client must change it at first sign-in.
OB-5	The platform never publishes invented claims. Services, figures, team and testimonials come from the client (or an AI draft the client approves).
OB-6	Customer accounts (phone + OTP) are not switched on for live clients until an SMS gateway is connected.
OB-7	Every payment is recorded as a transaction with payment mode and reference at provisioning.
OB-8	A domain must be owned by the client and pointed to the platform before go-live; branch sub-domains are pinned to their branch.

Part B — Client requirements template

Complete one copy per client. Tick the boxes that apply and write in the blanks. Sections map to the screens that will be configured.

5.1 Client details

Business name (as shown on website)	
Legal name	
Business type / trade	
Short description (one or two lines for login page and About fallback)	
GSTIN · PAN	
Head office address, city, state, pincode	
Business phone · email	
Currency · timezone	INR · Asia/Kolkata (default) / other:
Main admin — name, email, mobile	
Client decision-maker (if different)	

5.2 Business goals

Why the client is buying (main goal)	
How customers contact them today	☐ Phone ☐ WhatsApp ☐ Walk-in ☐ Social media
What they sell	☐ Products ☐ Services ☐ Both
Target go-live date	
Success measure after 3 months	

5.3 Plan and commercials

Plan name / code	
Billing cycle	☐ Monthly ☐ Quarterly ☐ Half-yearly ☐ Yearly ☐ Lifetime
Price · discount · tax · total	
Trial days (if any) · start date	
Auto-renew	☐ Yes ☐ No

Payment mode · reference · date	
Branches needed · admins needed · storage needed	
Special approvals (discount, storage override)	

5.4 Feature requirements

Tick what the client needs. Every ticked feature must be granted by the chosen plan.

Need	Feature (key)	Client notes
☐	WhatsApp buttons (`whatsapp`)	
☐	Share button (`share_link`)	
☐	Social media links (`social_media`)	
☐	About us page (`about_us`) · Figures (`figures`)	
☐	Team (`team`) · Gallery (`gallery`)	
☐	Contact page (`contact_page`)	
☐	Testimonials (`testimonials`) — curated / visitor reviews	
☐	Features / Benefits band (`features_benefits`)	
☐	Blog (`blog`)	
☐	Services (`services`) · Enquiry form (`service_enquiry`) · Slot booking (`service_booking`)	
☐	Product catalogue (`products`)	
☐	Cart & orders (`orders`) — requires products	
☐	Warehouse & stock (`warehouse`)	
☐	Counter invoicing / POS (`invoices`)	
☐	Customer accounts (`customers`) — after SMS gateway	

5.5 Branding and website

Website design	☐ Default (light) ☐ Midnight (dark, salons) ☐ Atelier (glass, decor)
Logo file (PNG/SVG) · favicon (.ico)	☐ Received ☐ Pending
Brand colours — primary · secondary · accent (hex)	

Primary domain (e.g. acme.com)	
Branch domains (e.g. surat.acme.com → Surat branch)	
Who controls DNS for the domain	
Hero slides — images (desktop + phone), headline, button text and link	☐ Client supplies ☐ AI draft
Menu names (e.g. "Services" → "Treatments")	

5.6 Branches and locations

Branch name	Address	Phone	Hours	Own domain / content?
Head office				

5.7 Content checklist

Content	Source	Status
About story (heading, intro, body)	☐ Client ☐ AI draft	
Figures (e.g. years in business since …, customers served)	Client only	
Team members (name, role, photo)	Client only	
Gallery photographs	Client only	
Testimonials	Client only — never invented	
Features / Benefits cards	☐ Client ☐ AI draft	
Contact page wording · form target (email / WhatsApp)		
WhatsApp numbers — inquiry · contact · support · orders		
Social profile URLs		
Blog posts (first 2–3)	☐ Client ☐ AI draft	

5.8 Services (if applicable)

Service categories	
Number of services · list provided as	☐ Spreadsheet ☐ Price list ☐ Brochure
Per service: title, summary, inclusions (≤6), price or price line, duration, photo	☐ Received

Enquiries go to	☐ WhatsApp + Service Leads ☐ Service Leads only ☐ WhatsApp only
Bookable services — opening hours, days, slot length, capacity per slot	
Button label (Enquire / Get a quote / Book a slot)	

5.9 Catalogue, orders and stock (if applicable)

Category tree (max 3 levels)	
Number of products · list provided as	
Per product: name, SKU, photos (≤8), price, offer price or price label, specs, stock status	☐ Received
Order mode	☐ WhatsApp ☐ Payment (UPI / link) ☐ None (price list only)
UPI ID / payment link	
Basket	☐ Cart ☐ Order one product at a time
Minimum order · required checkout fields	
Products not orderable (made-to-measure, display only)	
Warehouses (name, code, serves which branch, default)	
Opening stock per product per warehouse (with cost if known)	☐ Received
Invoicing: GST rates used, payment modes, invoice users	

5.10 Users, roles and permissions

Role name	Menus it may see	Create / edit / delete / export?
e.g. Counter staff	Invoices, Orders, Customers	Create, edit

Staff name	Email	Mobile	Role	Branch

Staff name	Email	Mobile	Role	Branch

The number of admin accounts (including the main admin) must fit the plan's admin limit.

5.11 Open questions, risks and dependencies

#	Item	Owner	Due
1			
2			
3			

6. Go-live acceptance criteria

✓	Criterion
☐	Company is active; subscription status *active* with the agreed dates; payment recorded as a transaction.
☐	Main admin has signed in and changed the password.
☐	Website opens on the client's domain over HTTPS, with the correct logo, favicon, colours and design.
☐	Login page of the company workspace shows the client's branding on its domain.
☐	Every feature in 5.4 is switched on and shows “live” (not “Nothing published yet”).
☐	Default slides replaced; no placeholder text left on the website.
☐	Branch domains show branch content (or inherit company content as agreed).
☐	A test enquiry reaches Service Leads and/or WhatsApp as configured.
☐	A test order is created, priced correctly, and moves pending → confirmed → dispatched with stock changing; then cancelled to restore stock.
☐	A test booking appears in the diary and can be accepted.
☐	A test invoice can be issued and printed; then cancelled.
☐	Each staff account signs in and sees only its permitted menus.
☐	All test orders, bookings and invoices are cancelled or marked before handover.

7. Handover and training

Session	Audience	Covers
Website editing (45 min)	Main admin	Company Details: profile, theme, functionality switches, slides, About, services, products, contact; branch overrides.
Daily operations (45 min)	Staff	Orders workflow, Service Leads and bookings, warehouse movements, invoices, customers, leads.
Administration (20 min)	Main admin	Roles, Menu Permission, Admin Management, My Plan, plan requests.

Handover pack: workspace URL and website URL; Document 09 User Manual; support contact; plan end date and renewal process; list of features included and how to request more.

8. Sign-off

Role	Name	Signature	Date
Client — authorised signatory			
Aj Smart Biz — onboarding executive			
Aj Smart Biz — approver
